

EcoGate 4.0 - Gen2 EAS

Gen2 EAS is a loss prevention technology that enables retailers to benefit from wider aisle widths, greater visibility of external theft, and item level stock visibility. Investing in Gen2 EAS will allow backwards compatibility with any existing EAS infrastructure and future-proof any transition to RFID technology.

The EcoGate 4.0 is a Gen2 EAS system, operating on an 860-960MHz RFID Frequency. It provides retailers with 2 audible alarms to differentiate between single and multiple items exiting the store without the correct removal of the security tag.

The EcoGate 4.0 can be networked to allow remote servicing, and provide up to date store level data and alerts to key personnel within the business.

Benefits to Retail

- Increased aisles of up to 4.0m with Hard Tags
- No incoming false alarms
- Identification of bulk thefts
- Pin Detection to reduce Health & Safety risks
- Item level stock visibility, increasing sales
- Lower Energy Consumption compared to the latest conventional EAS systems

Performance Specifications

Operating Distance	Up to 4.0m with Hard Tag
Energy Consumption	6W Max, 1.5W in standby mode, 0.5W in Sleep Mode
Dimensions	1550 x 460 x 45mm

Gen2 EAS Accessories

CE36012	860-960 MHz RFID Hard Tag
CE36061	Dual Technology 860-960 MHz RFID and 58kHz / 8.2MHz EAS Hard Tag
CE36081	Dual Technology 860-960 MHz RFID and 58kHz / 8.2MHz EAS Optical Tag T829 860-960 MHz RFID Square Pin. Enables existing Hard Tags to be upgraded to RFID and reduces Health & Safety risks associated with pins exiting the store
